-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**LACK OF UNITY**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-16 and 19-20, drawn to a compound of formula I or formula II:

I

II

Group II, claims 17-18, drawn to a method of treating an inflammatory disease, such as rheumatoid arthritis, osteoarthritis, pain, fever, dysmenorrhea, stroke using the formula (I) or (II).

The inventions listed as Group I, and Group II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

The international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").

PCT Rule 13.2 states " Where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression " special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

In the instant case , the invention of Group I is directed to the compound according to formula (I) or formula (II), whereas the invention of Group II is directed to the method of treating an inflammatory disease ,such as rheumatoid arthritis, osteoarthritis, pain , fever, mysmenorrrhea, stroke using the formula (I) or the formula (II)

According to Collins et al (U.S. 6,096,728), the reference discloses the method for the method of treating an inflammatory disease as shown below:.

A pharmaceutical composition comprising (a) an effective amount of controlled release polymer and (b) an effective amount of a proteinaceous IL-1 inhibitor. The composition exhibits a therapeutic effect on inflammation and is useful for treating IL-1 mediated inflammatory diseases, particularly diseases of the joint.

From this, the Group II is not required for the invention of Group I. Therefore, there is no special technical feature between Group II and Group I.

Therefore, there is no single general inventive concept and no unity of invention for the method or the process as defined in 37 CFR 1.475.

37 CFR 1.475 states that a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combination of categories:

- a. A product and a process specially adapted for the manufacture of said product;  
or
- b. A product and a process of use of said product; or
- c. A product, a process specially adapted for the manufacture of the said product,  
and a use of the said product; or
- d. A process and an apparatus or means specially designed for carrying out the  
said process; or
- e. A product, a process specially adapted for the manufacture of the said product,  
and an apparatus or means specially designed for carrying out the said process.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
